President of the P. G. A.

Dear Sir:

Today I visited the Llanorch Country Club at Manoa, Pa. at the request of P. G. A. member Marty Lyons. Arriving there I rather thought that I recognized the old Delaware Field Club of twenty five or thirty years back, although there had been many changes and improvements. It was the same.

After conferring with Lyons, greenkeeper Bob Pollock and Lester Lane of the committee, we went directly to the holes which offered the chief problems, namely the Third, Fourth, Seventh and the Thirteenth where I found all their troubles little ones and obvious. I gave the desired advice and in addition I suggested the drawing up of sand on the left of the Sixth Green. In passing let me say that the 165 yards Seventeenth is truly a gem, - a rarely fine hole. Pollock apparently is a most capable greenkeeper and in Lyons I found a credit to the profession.

Several other members of the committee joined our discussion and altogether there was displayed considerable interest in the work of the P. G. A.

Very truly yours

A. W. Tillinghast.
